## **Sutton**

**2181 (AREA Ha): 0.5**

harvesting  
records

*Karri - Main Belt*

Remote analysis (GIS)

The majority of this polygon is regrowth forest from clear fall in 1985. the actual boundary of OG is the track running SE from Winch rd.

*NON-OLD GROWTH. Area 2181 to be returned to the corporate database as non-old growth. Demarcation of the actual boundary will need to be undertaken by the proponent of any future activities adjacent to the area.*

[Map](#)

**2248 (AREA Ha): 0.5**

harvesting  
records

*Jarrah forest - South*

Remote analysis (GIS)

This is an isolated polygon not large enough to meet the minimum size for old-growth.

*NON-OLD GROWTH. Area 2248 to be returned to the corporate database as non-old growth.*

**2256 (AREA Ha): 0.5**

<b>Block Polygon #</b>	<b>Reason re-classified</b>	<b>Ecosystem type (FMIS)</b>	<b>Review process</b>	<b>Finding</b>	<b>Recommendation</b>	<b>Map</b>
------------------------	-----------------------------	------------------------------	-----------------------	----------------	-----------------------	------------

harvesting records  
Jarrah forest - South

Remote analysis (GIS)

Photo imagery indicates that the majority of the area has similar vegetation structure to adjacent old growth areas. The actual boundary of OG is North of Lockyer rd. The area to the South of Lockyer rd is regrowth logged in 1989

*OLD GROWTH. Area 2256 to be returned to the corporate database as old growth. Demarcation of the actual boundary will need to be undertaken by the proponent of any future activities adjacent to the area.*

[Map](#)

### **2273 (AREA Ha): 0.5**

harvesting records  
Karri - Main Belt

Remote analysis (GIS)

Photo imagery indicates that the majority of the area has similar vegetation structure to adjacent old growth areas. The actual boundary of OG is North of Lockyer rd. The area to the South of Lockyer rd is regrowth logged in 1989

*OLD GROWTH. Area 2273 to be returned to the corporate database as old growth. Demarcation of the actual boundary will need to be undertaken by the proponent of any future activities adjacent to the area.*

[Map](#)

### **2296 (AREA Ha): 0.5**

harvesting records  
Karri - Main Belt

Remote analysis (GIS)

Photo imagery indicates that the majority of the area has similar vegetation structure to adjacent old growth areas.

*OLD GROWTH. Area 2296 to be returned to the corporate database as old growth. Demarcation of the actual boundary will need to be undertaken by the proponent of any future activities adjacent to the area.*
